

B1 1. (amended) An inner container for a household device, said inner container comprising an inner and an outer wall with a shear-resistant connection between the two walls, where both the inner and outer walls have been built up from a thermoplastic, and where said inner container is in the form of a drum.

---

14. (new) An inner container as defined in claim 1, wherein the household device is a front- or top-loading washing machine, or a laundry dryer.

B2 15. (new) An inner container as defined in claim 7, wherein the thermoplastic comprises from 5 to 50% by weight, based on the total weight of the thermoplastic of reinforcing fillers.

16. (new) An inner container as defined in claim 8, wherein the inner wall has a thickness of from 2 to 5 mm and the thickness of the outer wall has a thickness of from 2 to 5 mm.

17. (new) An inner container as defined in claim 1, wherein a cavity situated between the inner wall and the outer wall has a thickness of from 20 to 150 mm.
